1.0 Overview

The following product is a music streaming interface, similar to commonly used everyday music applications used on personal music streaming devices. The interface allows users to open the application. Users are prompted to login via a standard username and password. Then they are logged in. Upon opening, they are presented with a profile containing a playlists or they can type and search for a song. Selecting the song plays it.

1.1 Organization of Use Steps

Sign Up

By entering a desired name and password into the provided boxes on the sign up page, the user can create an account

Login

- 1) Open the interface application.**
- 2) Login with your username and password.**
- 3) You are now inside the application!**

Playlists

- 4) A "create playlist" button will take you to another screen where you can enter the playlist name you wish to create.**
- 5) Finish creating the playlist by pressing "create"**
- 6) Underneath your profile, you will find your playlists displayed.**

Specific Songs/ Search

- 7) Going over to the search bar on the right hand side will allow users to search for a specific song**
- 8) The songs will appear underneath the search, which you can then select to play.**
